EF SET

EXPERIENCE

Full Stack Developer

Grupo Tepsi, 07/2023 - Present

- Developed management portals including a recent attendance system used for employee payment, using technologies such as Next.js, TypeScript, ASP.NET API and SQL Server.
- Implemented authentication, password encryption, roles, protected routes, forms, email sending and PDF generation, among others.

Pokedex

Mobile App, Personal Project, May 2023

- Built and designed a Pokemon app using React Native (Expo CLI) and TypeScript.
- Implemented Redux as the state management solution to handle application data.
- Created an Express API for user authentication, which also allows for real-time updates in the user's Favorites system.

Hotel Booking System

Desktop App, Personal Project, February 2023

- Created a Java app to manage clients' reservation information which are stored in a local MySQL database, utilizing a connection pooling mechanism.
- Implemented synchronized removal of customer information upon reservation deletion, ensuring data consistency.

EDUCATION

Systems Engineering, 2019 - Present

Universidad Tecnológica Nacional (UTN)

Mechanical Technician, 2013 - 2018

Escuela Técnica N°9 Ing. Luis A. Huergo
